Deep python and Django knowledge (>10 years of experience)

- Creation of the complex application architecture
- RESTful API design
- SQL related databases: MySQL, PostgreSQL
- Javascript experience: ReactJS, jquery,
- Tests and deployment automation (Gitlab, TravisCI, Bitbucket pipelines)
- Jira administration
- Git
- Sphinx docs
- Machine learning: data analysis, regressions, and neural networks
- Deep knowledge of Linux and FreeBSD
- Deep knowledge of network architecture and protocols

# **EMPLOYMENT HISTORY**

Jun 2018 - Current: Full-stack software engineer at EDU Ecosystem.

Company product development: education platform https://education-ecosystem.com

- API development with Django rest framework
- Video content delivery network architecture with Nimble Streamer
- UI development with ReactJS

Mar 2017 - May 2018: Senior python developer, the remote job at SMYT.

## Responsibilities:

- Outsource support of python/Django projects, developing new features for them
- Developing architecture for starting projects from scratch

May 2008 - Mar 2017: CTO at ISP "TIM", Uman, Cherkasy region, Ukraine.

## Software projects:

- Billing system for digital and analog TV clients (backend: Django, MySQL, JSON-rpc. frontend: extjs).
- Energy efficiency system for city authorities (gathering stats for resource usage, making reports, looking for places that need improvements).
- Worklog system and salary calculator.

- Storage management (Django, Django-admin for managers, ReactNative for mobile clients, ReactJS for desktop clients).
- Self-service terminals (interactive kiosks, our ISP has it's own hardware solution. API backend: Django, Django rest framework; local UI backend: Django; frontend: jquery-UI)
- Online tools for support center (automatic configuration, and monitoring of the network equipment. Django, Django-admin, celery).

# Responsibilities as a software developer lead:

- Project analysis and architecture design
- Database structure
- API design
- Selection of tools, frameworks, and libs for projects
- Mentoring and code review for team members

# Responsibilities as head of network operations center:

- Network architecture design
- Selection, setup, and administration of the network equipment and servers.
- Consulting of network administrators
- Mitigation of abnormal situations (DDoS attacks, hardware faults etc)
- JIRA configuration (workflows, scripts, integrations with Asterisk and customer database)

# Aug 2006 - May 2008: System administrator, ISP "TIM", Uman, Cherkasy region, Ukraine.

### Responsibilities:

- Setup and monitoring of network devices
- Clients technical support.

### Achievements:

- Received knowledge on FreeBSD and Linux OS, Cisco IOS and network architecture
- Created some scripts on Perl, bash, and PHP for automation of routine work
- Created the first version of web service for support center (IP addresses allocation and IP/MAC monitoring), pure PHP and MySQL DB. Started learning of Django python framework.

### **CERTIFICATIONS**

Please look at the certification list in the Linkedin profile.

### LANGUAGES

- English: reading, writing, listening Upper Intermediate level; speaking Intermediate level
- Ukrainian, native speaker
- Russian, native speaker

# **EDUCATION**
